INSTITUTE OF APPLIED SCIENCES AND TECHNOLOGY

ICT LAB #13

Course Code:	COMP-105L	Session	Fall 2025
Instructor	MS. Sibgha Noor	Semester	1 st
Task	13	Student Name	Eshal Ayub
Submission Date	15-01-2025	Roll No	B25F1061AI100

1. Introduction

In today's digital era, social media and collaboration tools play a vital role in information exchange, teamwork, and remote communication. These tools help students, professionals, and organizations collaborate effectively regardless of geographical boundaries. One such powerful collaboration tool is **Microsoft Teams**.

Microsoft Teams is a cloud-based collaboration platform developed by Microsoft. It integrates chat, video meetings, file sharing, and application integration into a single workspace. It is widely used in educational institutions and organizations for online classes, meetings, group discussions, and project collaboration.

2. Objectives

The objectives of this lab are:

- To understand the role of Microsoft Teams as a social media collaboration tool.
 - To learn how to create and join teams and channels.
 - To explore features such as chat, meetings, and file sharing.
 - To understand how Microsoft Teams supports information exchange and teamwork.
 - To gain hands-on experience using Microsoft Teams for collaboration.
-

3. Tool Overview: Microsoft Teams

Microsoft Teams provides a digital workspace where users can communicate and collaborate in real time. Key features include:

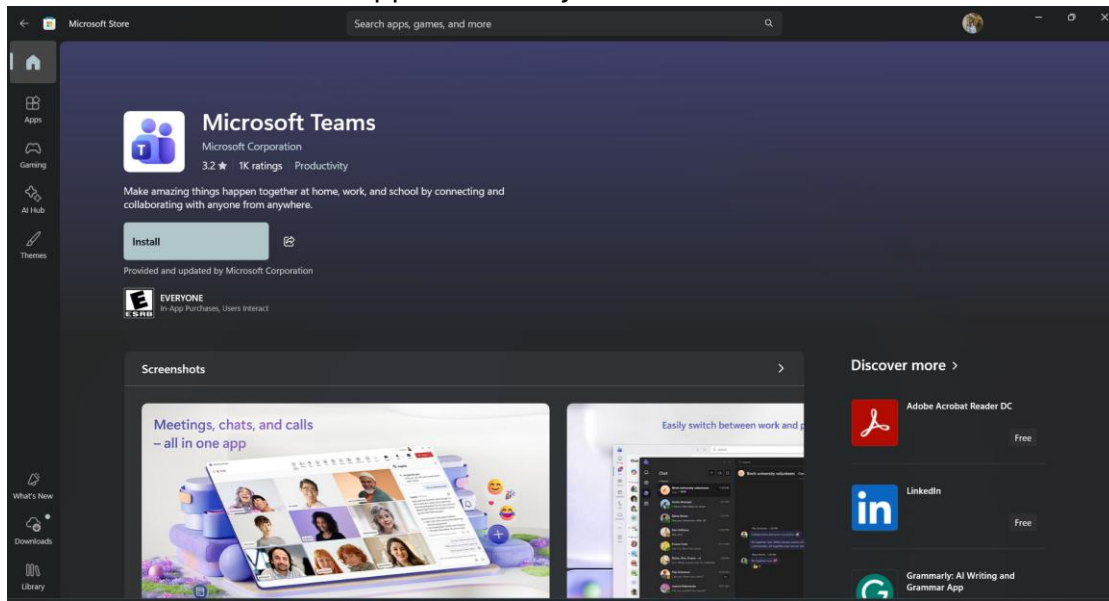

- Text chat (one-to-one and group chat)
 - Audio and video meetings
 - File sharing and collaboration
 - Channels for topic-based discussions
 - Integration with Microsoft Office tools like Word, Excel, and PowerPoint
-

4. Procedure

4.1 Installing Microsoft Teams

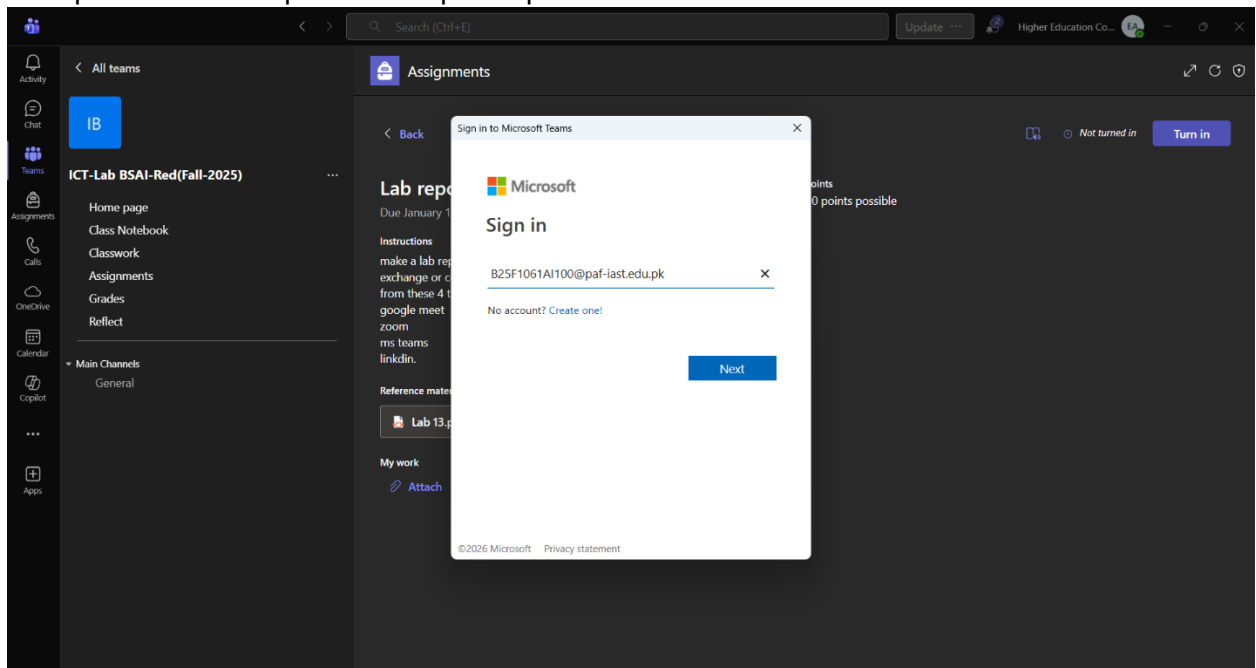

1. Open the Google Play Store, Apple App Store, or visit the official Microsoft Teams website.
2. Search for **Microsoft Teams**.

3. Download and install the application on your device.

4.2 Creating an Account

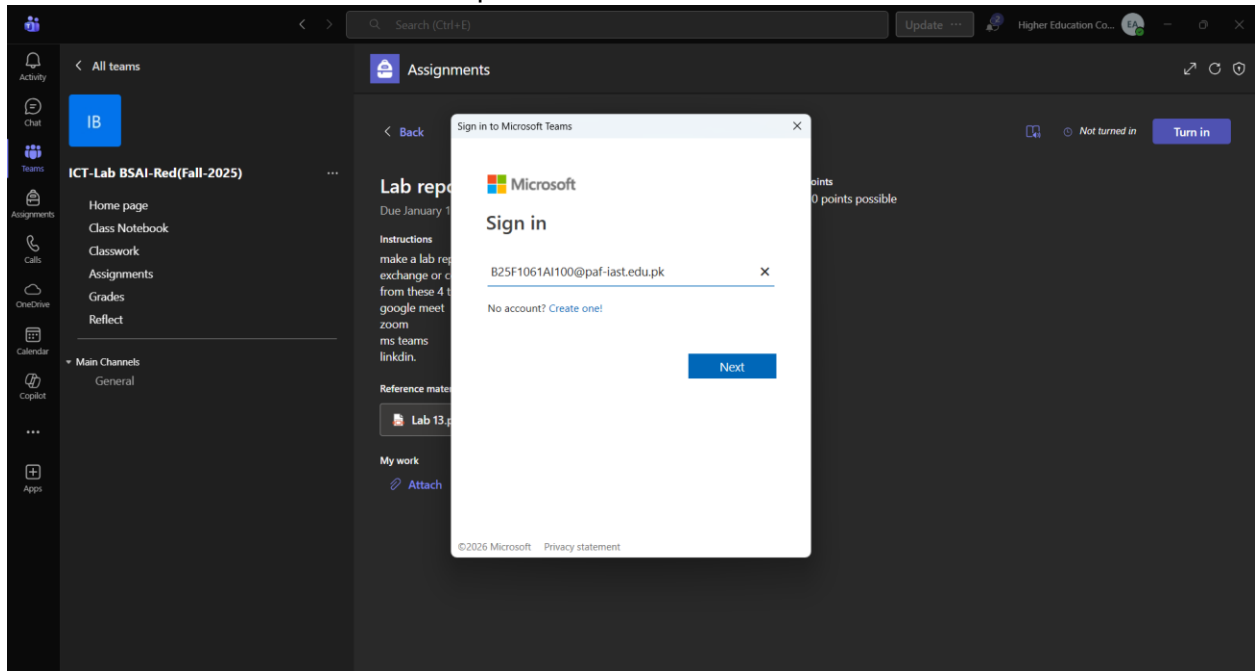

1. Open the Microsoft Teams application.
2. Sign in using a Microsoft account or institutional email address.
3. Complete the basic profile setup if required.

- 4.

4.3 Creating or Joining a Team

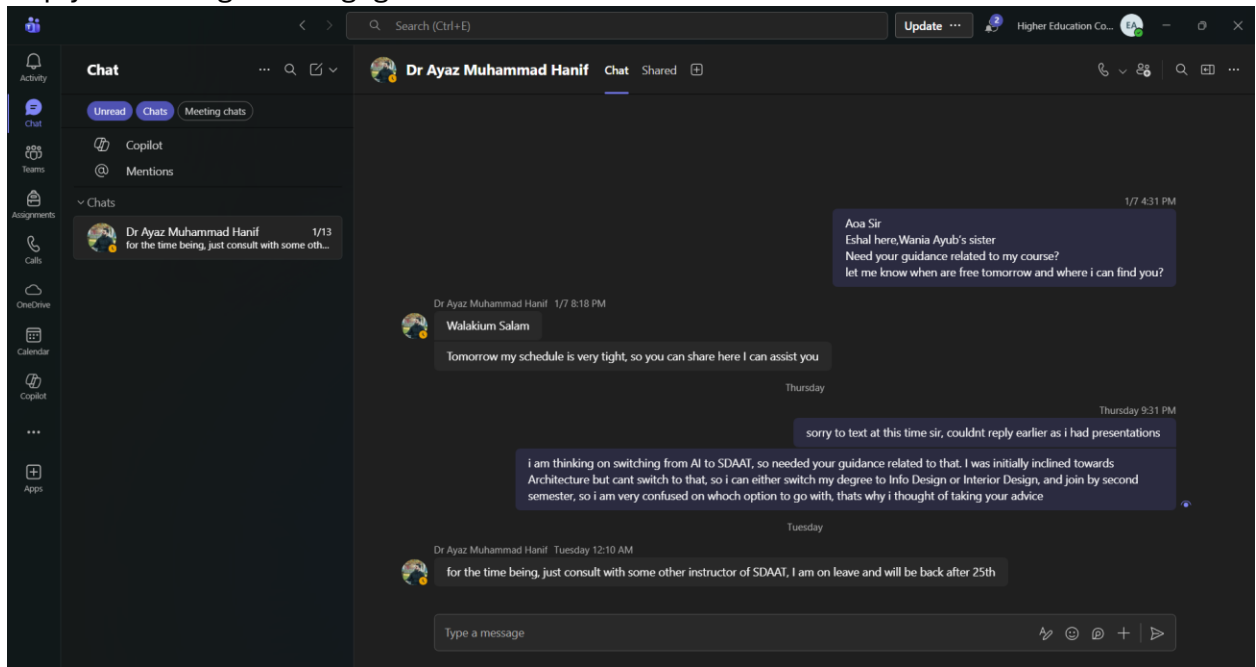

1. Click on the **Teams** option from the left menu.
2. Select **Join or Create a Team**.
3. Choose **Create Team** or enter a team code to join an existing team.
4. Provide the team name and description.

4.4 Using Channels for Information Exchange

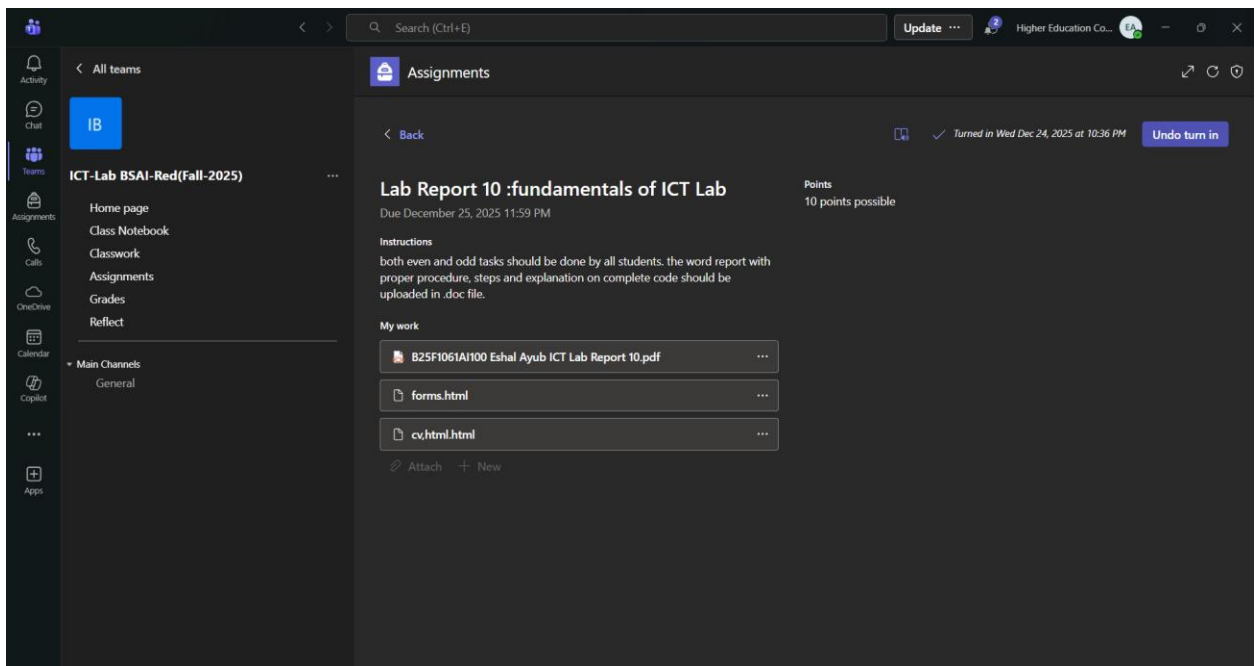

1. Inside a team, open a channel (e.g., General).
2. Post messages, announcements, or questions.

3. Reply to messages to engage in discussions.

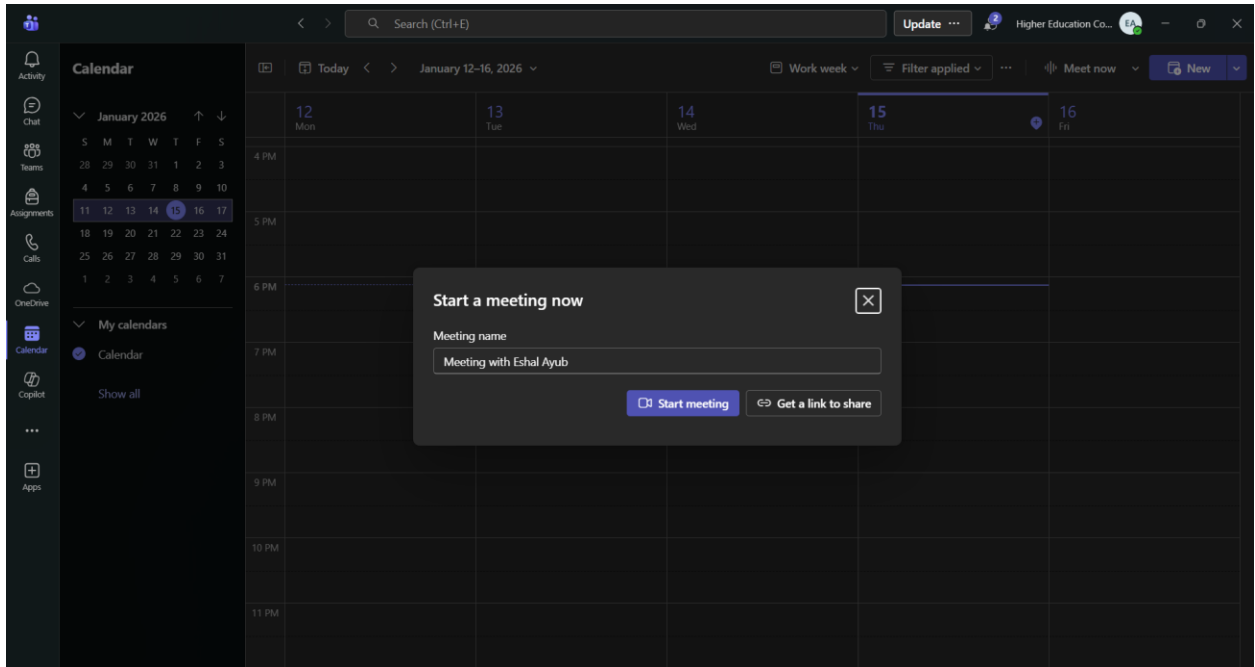

4.5 File Sharing and Collaboration

1. Open a channel and click on the **Files** tab.
2. Upload documents such as PDFs, Word files, or presentations.
3. Team members can view, edit, and comment on shared files in real time.

4.6 Conducting Online Meetings

1. Go to the **Calendar** section.
2. Schedule a meeting or start an instant meeting.
3. Invite team members to join.
4. Use audio, video, screen sharing, and chat during the meeting.

5. Observations

- Microsoft Teams provides a user-friendly interface.
- Real-time chat and meetings improve communication efficiency.
- File sharing and live editing make collaboration easier.
- Channels help organize discussions by topic.
- Internet connectivity affects meeting quality.

6. Advantages

- Easy communication and collaboration
 - Supports remote learning and teamwork
 - Secure and reliable platform
 - Integration with Microsoft Office tools
 - Suitable for academic and professional use
-

7. Limitations

- Requires a stable internet connection
 - Some advanced features require a paid subscription
 - Can be confusing for first-time users
-

8. Conclusion

Microsoft Teams is an effective social media collaboration tool for information exchange and teamwork. It enables users to communicate, share files, and collaborate efficiently in a virtual environment. Through this lab activity, we learned how Microsoft Teams supports collaboration in education and professional settings, making it a valuable tool in the modern digital world.

9. Result

The lab was successfully completed, and Microsoft Teams was explored as a social media tool for information exchange and collaboration.
